- Supports popular pay periods; weekly, biweekly, and monthly

- Automatic card feed and alignment eliminates user errors commonly made by employees

- Track tardy and early or late departures makes attendance violations easy to manage

- Includes Job Cost Mode for tracking time spent on task, customer or job

Icon Time Systems' CT-900 is a flexible and fully customizable time clock solution designed specifically to meet the needs of small to mid-size businesses with less than 100 employees.

Not only is the CT-900 easy to use for employees accustomed to more traditional time clocks, the CT-900 is the next generation of employee time clocks that allows you, the small business owner, to automate and fully customize time records, total employee time, round punches, and deduct breaks based on your individual user-defined settings.

The CT-900 also comes with an extensive suite of advanced features that will help you tailor and professionally manage your employee time and attendance records by eliminating costly manual errors, saving you time and money by reducing costly payroll mistakes.
