

**Icon Time Systems® PROX™ Employee Time Clock Package**

*A simple wave of the badge within inches of the unit, clocks your employees IN or OUT — without even removing the badge from the wallet or purse.*

**The PROX Employee Time Clock:**

- Supports 50 employees (expandable)
- Uses the latest Proximity technology
- Lets you use multiple clocks at once
- Allows PIN entry at the clock if badge is lost

**How easy is it?**

**SETUP**

Setting up the Icon Time Systems Time Clock is as easy as attaching the mounting bracket to the wall and lock the time clock into place with the key. Connect the 50-foot cable to a PC that's running TimeVue® Lite Time & Attendance software (included) and you're off and running.

- With the time spent manually calculating timecards—not to mention human error—our clocks will pay for themselves in a matter of months.
- Proximity systems are rapidly replacing magnetic stripe or barcode badge systems: Badges don't wear out, can't be duplicated, and use internal (not exposed) electronics to read the card.
- Proximity badges can be customized with an employee picture.

**CLOCK IN OR OUT**

Wave the Proximity badge within a few inches of the unit to clock IN or OUT. Allows employees to view their last punch at the clock.

**MANAGE**

TimeVue® software does the calculating for you: regular hours, two levels of overtime, and an unlimited number of other hour categories such as sick, vacation and holidays. Track tips earned or job numbers, change departments, or edit punches at the clock or at the PC. TimeVue software gives you the power and control to execute payroll your way!

**EXPAND**

Need more clocks? Add them using your choice of serial (direct to PC connection included in the package) or modem communications. Also, customize your software and increase capacity with additional modules, and add multi-user licenses to share data with any computer on your network.

### Employee Capacity

- Standard software capacity, 50 employees
- Software – Can be upgraded to unlimited capacity at additional charge
- Clock – 200 employees per clock

Note: Please contact Icon Time Systems for upgrades larger than 200 employees

### Add-on Modules

- Job costing
- Auto Poll
- Sick, holiday and vacation accrual
- User security options

### Benefits are key.

#### THE PROX EMPLOYEE TIME CLOCK PACKAGE:

- Tracks regular time and two levels of overtime
- Lets managers edit timecards and check attendance at the time clock
- Lets you view/print timecard, Who's IN/OUT, Missed Entry, Total wage reports, and more
- Exports timekeeping data to QuickBooks, ADP®, Paychex®, ASCII, Microsoft®, and many other payroll export programs (upgrade fee may apply)
- Sustains all pay period types (one pay period)
- Accepts tips, job numbers, and department changes at the clock
- Archives data and stores employee records for unlimited time
- Includes free 30-day technical support

#### WHAT'S IN THE BOX?

- PROX Employee Time Clock
- TimeVue® Lite Time & Attendance Software for 50 employees
- 15 Proximity badges
- 50-foot serial cable
- Wall-mounting bracket
- Two mounting keys
- Fully illustrated User Guide
- One-year parts and labor warranty
- AC power adapter

### Intelligent Storage™ protects valuable employee data.

Intelligent Storage is a fail-safe method that allows you to record and access employee information whenever you need it.

#### INTELLIGENT STORAGE:

- Greets employees with name when signing IN or OUT
- Provides on-screen guidance for transactions
- Allows employees to change departments and add tips or job numbers
- Allows employees to check last punch right at the clock
- Permits time clock use without being connected to the clock at all times
  - Remove the clock from the wall
  - Walk it to your PC
  - Poll the punch data or use a laptop PC to visit multiple locations
- Reduces training time with on-screen instructions
- Increases employee satisfaction: They can see that information is being accurately recorded

**Call our Sales Department at 1-800-847-2232, and press option 3 for packaging details. We'll help you build/create a clock that answers your business needs.**
